

ELECTRIC VEHICLES FUNDAMENTALS

Comprehensive Training Program

In 2025, Electric Vehicles (EV) are projected to reach a significant market share, with forecasts indicating they will account for over a quarter (25%) of all car sales worldwide, surpassing 20 million units sold.*

To help meet the growing demand for EVs and battery-operated devices, SME is introducing its first Electrification Certification, Electric Vehicles Fundamentals, to increase talent in the EV industry. This credential is designed for entry-level positions in the areas of automotive assembly and production for electric vehicles. The EV Fundamentals will also provide the necessary skills for individuals with no background in vehicle production and assembly or for individuals who have experience in this area but need to tailor their knowledge to the EV market. The credential is ideal for high school and college students, dislocated workers, under-employed individuals, veterans, at-risk youth, and others who are seeking new employment in a new, fast-growing industry.

SHORT-TERM, COMPREHENSIVE TRAINING

The online classes from Tooling U-SME cover topics agreed upon by manufacturing experts as being relevant for foundational EV knowledge across a wide-range of industries. The information is presented in an engaging and interactive format for maximum effectiveness, and pre-and post assessments measure a student's increased knowledge. Classes are self-paced, typically taking 60 minutes to complete. The training program can be completed in just a few weeks (typically less than one month). They are conveniently accessible anytime, anywhere on desktops and laptops, and on tablets and phones with the Tooling U-SME app.

* International Energy agency, IEA

BUILD A COMPREHENSIVE FOUNDATION OF KNOWLEDGE

This program focuses on the fundamentals of electric vehicles required as a starting point for any career pathway a candidate may pursue in the field of EV:

EV Production and Assembly	Electrical Units
Safety	Power Sources and Variables
Quality	Battery Components and Management
Measurement	Fundamentals of Electric Mobility
Robotics	
Blueprint Reading	

EARN A NATIONALLY RECOGNIZED CERTIFICATION

The SME Electric Vehicles Fundamentals (EVF) is focused on the fundamentals of Electric vehicles. The credential can help individuals begin a lifelong career in a growing industry where there is opportunity for advancement and good-paying jobs.

sme.org/EVF

GAIN VISIBILITY WITH A DIGITAL BADGE

Upon passing the certification exam, individuals will earn a digital badge, providing enhanced opportunities to share their qualifications and get discovered by employers.

ELECTRIC VEHICLE FUNDAMENTALS EXAM PREPARATION TRAINING CLASSES

Introduction to Electric Mobility Manufacturing 101	Introduction to Assembly 101
Introduction to Electric Vehicle Charging 150 Overview	Introduction to Soldering 100
of Electric Vehicle Components 200 Battery	Introduction to Welding Processes 151
Management System Overview 250	Introduction to Smart Manufacturing 100
High Energy Batteries 325	Automated Systems and Control 216
Safety for Electrical Work 111	Introduction to Collaborative Robots 275 Introduction
Lithium Ion Battery Handling & Safety 330	to Robotics 201
Fire Safety and Prevention 181	Robot Axes and Pathways 280
Hazardous Materials Handling 155	Robot Safety 211
High Voltage Safety 255	Robot Application 215
Introduction to OSHA 101	Introduction to CMM Arms 362
Lockout/Tagout Procedures 141	Nondestructive Testing 211
Personal Protective Equipment 111	Lean Manufacturing Overview 101
SDS and Hazard Communication 151	Quality Overview 111
Additive Manufacturing Methods and Materials 141	Customer-Focused Quality 155
Additive Manufacturing Safety 121	IATF 16949:2016 Overview 222
Battery Selection 231	5S and Hand Tool Identification*
DC Power Sources 271	Essentials of Communication 115
Electrical Units 101	Handling Interpersonal Conflict 180
Introduction to Fluid Systems 101	Professional Communication Pitfalls 165
Basic Measurement 101	
Blueprint Reading 131	Lockout Tagout Procedures*
Intro to Adhesive Bonding 110	Power Tool Safety*
Intro to Coating Composition 110	Safety Awareness in Manufacturing*
Introduction to Battery Pack Design and Assembly 240	5S and Hand Tool Identification*

* Optional Virtual Labs
